Welcome Screen

Hey, Boomers!

'Tis the season to be jolly - or so they say. I'm certainly feeling jolly - jolly well fed up!

Those lazy humes started their Christmas party about a week ago and have left me to produce Britain's top Sega-powered comic almost single-handedly! That normally wouldn't be a problem for such a talented droid as myself, but I was also landed with the job of producing, not one, but two issues of the brilliant new **Sonic The Poster Mag**, organise competitions, decorate the office, write the Christmas cards and keep the humes' party stocked with large packets of smokey bacon flavoured crisps! Phew, glad I installed my heavy-duty batteries!

Though I do say so myself, I'm pretty chuffed with **Sonic The Poster Mag**. Two mega-brilliant posters, backed up with great features - and only £1.35 each. If you haven't already got one, rush out and buy **STPM** no.1 now. It features a giant poster of Sonic in underwater action, and reveals stacks of info about the new Sonic The Hedgehog TV cartoon series. **STPM** no.2 stars ol' Egg Breath himself, Doctor Robotnik, in another giant poster and features detailed hints and tips on how to defeat the bad Bosses in the new Sonic Chaos game.

Now, wasn't there something I was going to tell you about this issue concerning a new series? Oh, yes. The newest **STC** superstar joining us next issue is...Tails! That's right, so many of you have begged us to let Tails have his own series, that that's just what we're going to do. So, stand by, Tails fans - your hero begins his adventures in two weeks' time in our special Christmas issue!

Gotta go now, those lazy humes have run out of crisps again.

TAILS FLIES SOLO!

Dateline: Emerald Hill Zone. Miles 'Tails' Prower, constant companion of Mobius hero, Sonic The Hedgehog, has mysteriously disappeared from the Zone. Members of G.R.O.O.M., (Get Robotnik Out Of Mobius Movement), reported seeing the young, twin-tailed fox, disappearing into a strange portal that seemingly materialised out of thin air a few days ago. Witnesses claim to have seen other fox-like creatures through this unnatural doorway before it suddenly disappeared.

Just what has happened to Tails? A full report will begin in the very next issue of **STC** - the comic that tells it like it is!

SUPER SUBS

Having trouble getting hold of **STC** on a regular basis? About to move to some remote part of the planet, but can't bear to miss out on a single issue? Fret no more. . .subscribe to Sonic The Comic! That's right, from this issue, **STC** is available on subscription. Make sure of an entire year's supply of Britain's Only Official Sega Comic by turning to the back of this issue now.

Hint: **STC** Subs make great gifts. Drop a word in a generous adult's ear now.

SONIC CD

game type: **ACTION**
1 PLAYER

Get ready for the ultimate *Sonic the Hedgehog* game! **Sonic CD** is the most amazing Sonic adventure to date, with over 75 levels to work through. You are up against old Egg-Features once again. Yes, Doctor Robotnik is back, fatter and uglier than ever. To beat him you not only have to work your way through many new zones, but you actually do some time travelling back to the past and into the future.

All the familiar Sonic moves are there - like dash and spin attacks - plus many additional new moves, like a speedy run, with Sonic's legs looking like rubber bands!

Like *Sonic 2*, collecting over a set number of gold rings warps you to a special bonus round. This time Sonic is running along a scaled road trying to collect

rings while taking out alien ships above him. This is fast, fun and makes you incredibly dizzy!

What really helps to set this new Sonic romp apart from the previous cart-based games is the incredible

music, which has some seriously huge 'choons' as well as mournfully soulful ballads.

The gameplay also has a few novel touches with Sonic taking super-leaps off floors to scale heights, plus there's also some weird springs rolling around on casters!

If you want to see what the Mega CD can do, then you will not be disappointed with **Sonic CD**. It has plenty of levels, fabby music, great gameplay combos, an amazing bonus round, and even a level select cheat!

There's lot's more about this game - in fact too much for the space available here. A glance at the mega-special preview of **Sonic CD**, STC 9's News Zone, will show you just how good it looks.

By the way, if you should happen to complete the game, you get to see a gob-smacking end sequence and some awesome scaling. Go for it! - VL.

The most incredible graphics ever! Yet another vertical shoot 'em up.

OVERALL 85%

The poor old Mega CD has taken a lot of stick over the last six months or so, with people saying it just does not have any hot games. Well look no further here as **Silpheed** is quite literally the most gob-smacking shooting game I have ever played.

You first take control of a nimble spaceship, the object being to protect your world from the invading hordes. There are many varied scenes to work through and your ship can move left and right, as well as into the screen. Aliens attack from all sides, and you can take them out with your laser cannons, or a choice of different weapons, which you power-up between each stage. You also have a special option weapon with limited ammo; this is effectively your smart bomb, so use it wisely.

The planets and ships you're up against are totally, totally awesome. You really have to see the graphics and explosions to believe that this is a game played at home.

There are the most enormous spaceships exploding into literally thousands of pieces - each of which spins and rotates! There are asteroid belts with the biggest asteroids you have ever seen whizzing

fast and exploding in your face.

The music and sound effects are also superb. **Silpheed** has genuine playability, although the actual depth of gameplay is limited by the type of action.

I cannot stress this enough - get this game if you own a Mega CD. If you do not yet own a Mega CD then **Silpheed** is the game that will give you a reason to buy one! - VL.

Great presentation and depth. Can be slow to get in to.

Ecco fans from the Mega Drive can thrill to this stunning conversion to the Mega CD.

The **Ecco** CD game has the same concept, and pretty much the same play as the original. You take the role of Ecco and the aim is to find out what has happened to your family (or 'pod'), who were taken from you by a mysterious alien force. You get to explore underground caves, talk with other sea creatures and use your wits and speed to overcome the obstacles stacked against you.

Your movements are limited to swooping out of the sea, ramming creatures, or moving objects around, but believe me you will need serious brainwork to finish this game. **Ecco** blurs the line between arcade action and strategy beautifully, and it is quite intuitive to play.

The extra touches on this game include the impressive use of Q-Sound. This is an amazing sound processing system that seems to come from all around you on any standard stereo system. To get the most from this game, hook your Mega CD up to a hifi and listen to the haunting tunes and sounds! There is also some digitised footage but you have to find it first as it's sneakily hidden away!

Ecco The Dolphin is a

stunning example of what Mega CD can do to a standard Mega Drive game. In its own right it is stunning. The tunes and play will stay with you long after you switch it off! - VL.

REVIEW

PGA TOUR GOLF

game type: SPORTS
1 PLAYER

PGA Tour Golf started life as a sports sim for the PC. Creators Electronic Arts then issued it, minus a trick or two, on the Mega Drive and SNES. Now Tengen (eager to capitalise on its good rep) have licensed it for all Master System and Game Gear owners, albeit without most of its lush green gloss.

What remains are the bare bones of a good golf game. The gameplay initially looks quite promising. The opening menu screen offers several game options (a practice round, a visit to the driving range, a putting green, or the full blown tournament) and the option of playing against a computer generated opponent. Sadly, what follows is really not worth getting your plus fours in a swing for.

For starters, the graphic screens build slowly and the sight of a white ball bouncing about in a largely featureless green box, doesn't come close to freshly cut grass and sandy pits.

And Tengen can't blame the humble Master System for the weak display. Sega's own (ancient) GolfMania is evidence that an 8-bit console can deliver a golf game that's interesting to look at and fun to play.

It's not all bad, though. Games can be saved with the battery back-up and resumed later on and the secret of a good slice takes time to learn.

For what it's worth, there's very little difference between the Master System and the Game Gear versions of PGA Tour Golf - but neither cart exhibits much in the way of an interesting noise. - SM.

GAUNTLET IV

game type: ARCADE
1- 4 PLAYERS

Your head spins like a Mega CD, your heart beats faster than a Shaman dance track. The slap of demon feet and the chill wind of ghostly breath is closing in all around you. Press Pause. Just when you thought that this particular arcade adventure had passed its sell-by date, you're lured back into the dank, dark, decidedly dodgy dungeon depths of Gauntlet, the never-ending maze of a mystery game.

Version four of Gauntlet is much like those that have gone before, only with a few extra twists and turns thrown in for good measure. The game sports the same bat's eye view of the playing field, and the same swarm of buzzing, bad-tempered baddies (ghosts, grunts, demons, lobbers, etc.) are all out for blood (yours!).

There is, however, a certain variety of thrill on offer this time round. You can select one of four game modes (Arcade, Quest, Battle and Record) and four characters (Thor the Warrior, Thyra the Valkyrie, Merlin the Wizard and Questor the Elf).

The Arcade option is the most familiar. The idea is to survive as many levels as possible, finding the key (or keys) to the exit of each floor, while hoovering up assorted magic potions, treasures and snacks. The Battle mode pits players against each other, while the Record mode allows

you to beat a personal best performance. The most enjoyable alternative is Quest, which sets your player on - well, a quest. Unlike the Arcade mode there's a good number of puzzles to solve.

Atmosphere has always been one of the key attractions of Gauntlet, and in this version there's some excellent voice synthesis to merry the mood. You'll certainly feel a rush of adrenalin when the ghostly hordes close in around you. Graphically though there's little to get excited about. The verdict: fine, even if it is about as fresh as a week old pop tart. - SM.

THESE ARE THE CHAMPIONS!

Eternal Champions challenge street fighters

As hinted at in this Zone last issue, Sega is about to take you to the next level in fighting games! **Eternal Champions** is a big (24 Megabit!) tournament game for the Mega Drive, due for release next month.

Eternal Champions will seriously challenge *Streetfighter 2* with its new features and incredible depth of gameplay and storyline. The key to this new game is the fact that it was designed specifically for use at home rather than being just another arcade conversion. **E.C.** features over 300 moves with each of the nine starring characters having seven special moves of their own.

The scene is set in the far future with The Eternal Champion pulling together the greatest fighters from history to help save Earth's future. You have to choose a fighter and then beat all the rest of them before you eventually square up to the Eternal Champ in a battle to the finish!

The graphics are awesome with the biggest characters ever seen on the Mega Drive. Super sound samples give bone-crunching effects and some of the moves are blindingly fast.

Eternal Champions' nine characters are each unique in their appearance, fighting style, and special moves. If they (or you!) perform exceptionally well in battle there are also special end sequences to show their fates.

Midnight and Trident duke it out near the ancient city of Atlantis.

Jetta and Xavier square off in old Salem, where witches and warlocks were burned at the stake!

Let's meet the Champs:

R.A.X. COSWELL

Half-man and half-cyborg from 2345 A.D. Fighting style: Thai Kick Boxing.

JETTA

A circus acrobat from 1899 A.D. Fighting style: Savate, the art of hand and foot fighting.

SLASH

A hunter from the dawn of time. Fighting style: Any move or attack that will cause pain or damage!

BLADE

Bounty hunter. Fighting style: Kenpo; a hand and fist method.

SHADOW YAMOTO

A corporate assassin from the present day. Fighting style: Taijutsu-Ninjitsu, combining the precursor to judo and the art of invisibility.

MIDKNIGHT

Once a bio-chemical scientist from 2101 A.D., now a living vampire. Favours the Hapkido fighting style

LARCEN TYLER

An ex-cat burglar from 1920's Chicago. Fighting style: Preying Mantis Kung Fu.

TRIDENT

Amphibian gladiator from Atlantis, 110 B.C. Fighting style: Capa Geria, gladiatorial martial art.

XAVIER:

A warlock and alchemist from Salem, 1692 A.D. Fighting style: Hapkido Cane.

The game features a whole host of options and play modes to help you define and refine your skills and you can play it with either three or six button pads!

Eternal Champions is likely to be one of the hot games of 1994 and STC will be bringing you lots more information about the characters, the game and some mega-surprises we've got up our sleeves. Stay in touch with STC!

BEANS MEAN ROBOTNIK

Doctor Robotnik cracks game market at last

As we mentioned last issue, Doctor Robotnik - villain-in-chief to Sonic The Hedgehog - is getting his crack at mega-stardom in his own video game.

Doctor Robotnik's Mean Bean Machine is due for release on the Mega Drive next month, and the Master System and Game Gear soon after.

This is a conversion of a Japanese Mega Drive game called **Puyo Puyo**, the style of which is similar to that classic puzzle game, **Columns**. In it there are linked beans dropping down

the screen and the object is to match up colours in racks of four. The difference being that you can link

them if they are touching in horizontal, diagonal and L shapes!

The idea behind **Doctor Robotnik's Mean Bean Machine** is that Robotnik is trying to turn all the beans from Beanville (honestly!) into slaves with his evil Mean Bean Steaming Machine.

You have to save the day and outwit the cronies he sends against you!

VIRTUAL RACER

State-of-the-art racing game roars towards Mega Drive

Virtua Racing, the incredible Sega arcade game, is close to completion in its new Mega Drive incarnation. As reported before in STC, this amazing coin-op game, featuring state-of-the-art 3D polygon graphics, has been faithfully converted from the arcades by a team actually sharing the same room as the group who produced the arcade original.

Virtua Racing is everything the arcade game is - and more! Incredible as it may sound, this game is blindingly fast and, believe it or not, it's actually faster than the arcade game! With exactly the same tracks as the coin-op version, you can switch the perspective you are viewing from. Plus, there's also a choice of manual or automatic gears on your car.

Virtua Racing for the Mega Drive has a provisional release date of March 1994, though this is subject to last-minute change. One thing's for sure... it's a game worth waiting for.

Dragon's Revenge is the follow-up to the classic pinball game *Dragon's Fury*. Tengen claim it retains all the superb gameplay of the original with the addition of some amazing bonus levels. PREDATOR

Predator is a very nice game for the Master System. It includes good graphics, decent sound, but is fairly hard. If you have found it hard going getting to the later levels, here are five codes to help you:

| LEVEL | PASSWORD |
|-------|----------|
| 2 | SPOGURD |
| 3 | ROTADERP |
| 4 | SEGATSON |
| 5 | NAGIRRAH |
| 6 | LAICIFFO |

Tips

The second best Sega game ever created, (Sonic is first, of course!) **Aladdin** was greeted with amazement by everyone due to the standard of animation. With the majority of Sega owners either having the game or due to get it for Christmas, I thought I would give you some tips to help you along the way:

1. Remember to touch the Blue Vases. In the event of you dying, this enables you to re-start from this point, instead of the beginning!
2. If you are finding it difficult to get past the knife-throwing baddies, try using the Apples more often before you reach them. A good idea is to jump over the Knife after it has been thrown to

stop your energy being depleted.

3. Pick up as many big blue Genie tokens as you can. This way, when the level is complete, you'll have a chance to earn more lives etc on the Bonus Machine game.

4. Whenever you see a Camel, jump on its back to get rid of enemies.

5. At the end of the level 'Agrabah Rooftops,' you will encounter the first two bosses. The first one is easy; hit him eleven times, but watch out for his fast moving sword. The second boss is also easy if you know the technique. When a barrel is thrown, jump in the air and throw an apple. Repeat this to defeat him.

6. During Abu's bonus rounds, keep to the centre of the screen. That way, when anything falls from the sky you can quickly determine which way to go to avoid being hit.

What a Load of...

Dear STC,

After reading through an issue, I thought, 'what a complete pile of . . . quality reading'. Not a black and white rip-off in sight. Excellent! But I must say that you should always include free gifts like stickers and badges just to make it more than worth it.

What a complete . . . coincidence, Mark. You must be ecstatic after our recent spree of free cover gifts.

Shoppers' Paradise

Dear STC,

I was walking around the local supermarket with my gran, bored out of my mind, while she bought lots of rubbish. I decided to wander off and look at the magazines and then I saw it - **Sonic the Comic**. I ran back with the issue to my gran shouting: "Can I have it?" "O.K.", she said, and I read it all the way round the aisles until we got to the check-out counter.

S-T-She

Dear STC,

What I want to know is: are there any other girls out there? I'm sure I'm not the only girl who reads STC. Computer games are not just for boys. I also think you should print more letters and drawings. Apart from that, keep up the good work.

Helen Williams, Newport, Gwent. MD owner.
Sonic Water Fun Game Winner.

Actually, Helen, I sympathise with the hime who thinks he's in charge, because of the two bossy female-types here at STC. But I do agree that computer games are not just for boys - or humans, for that matter.

An old hime proverb: Don't believe everything you read in the press.

So, Christopher, you only want to know your kindly gran when you need something from her. Have you thought of becoming a politician when you grow into a bigger hime?
